## **DETAILED ACTION**

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: In claim 1 the last paragraph lacks antecedent basis with the specification.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Mizushima et al 5,419,463.

Mizushima et al show a pump comprising a body 2, shaft 6, handle 5, piston 7, inlet valve 3 and biasing member 8. Mizushima et al show the piston 7 having an outwardly and inwardly extending flange in figures 5-6. It is inherent that when fluid is in the lower portion of the chamber and under force of the biasing member, the fluid will force the second outwardly extending flange towards the interior wall of the body/chamber 2.
